916-324-5930

AB 32 and the Scoping Plan

AB 32:

- Requires California return to 1990 greenhouse gas (GHG) emissions by 2020

AB 32 and the Scoping Plan

AB 32:

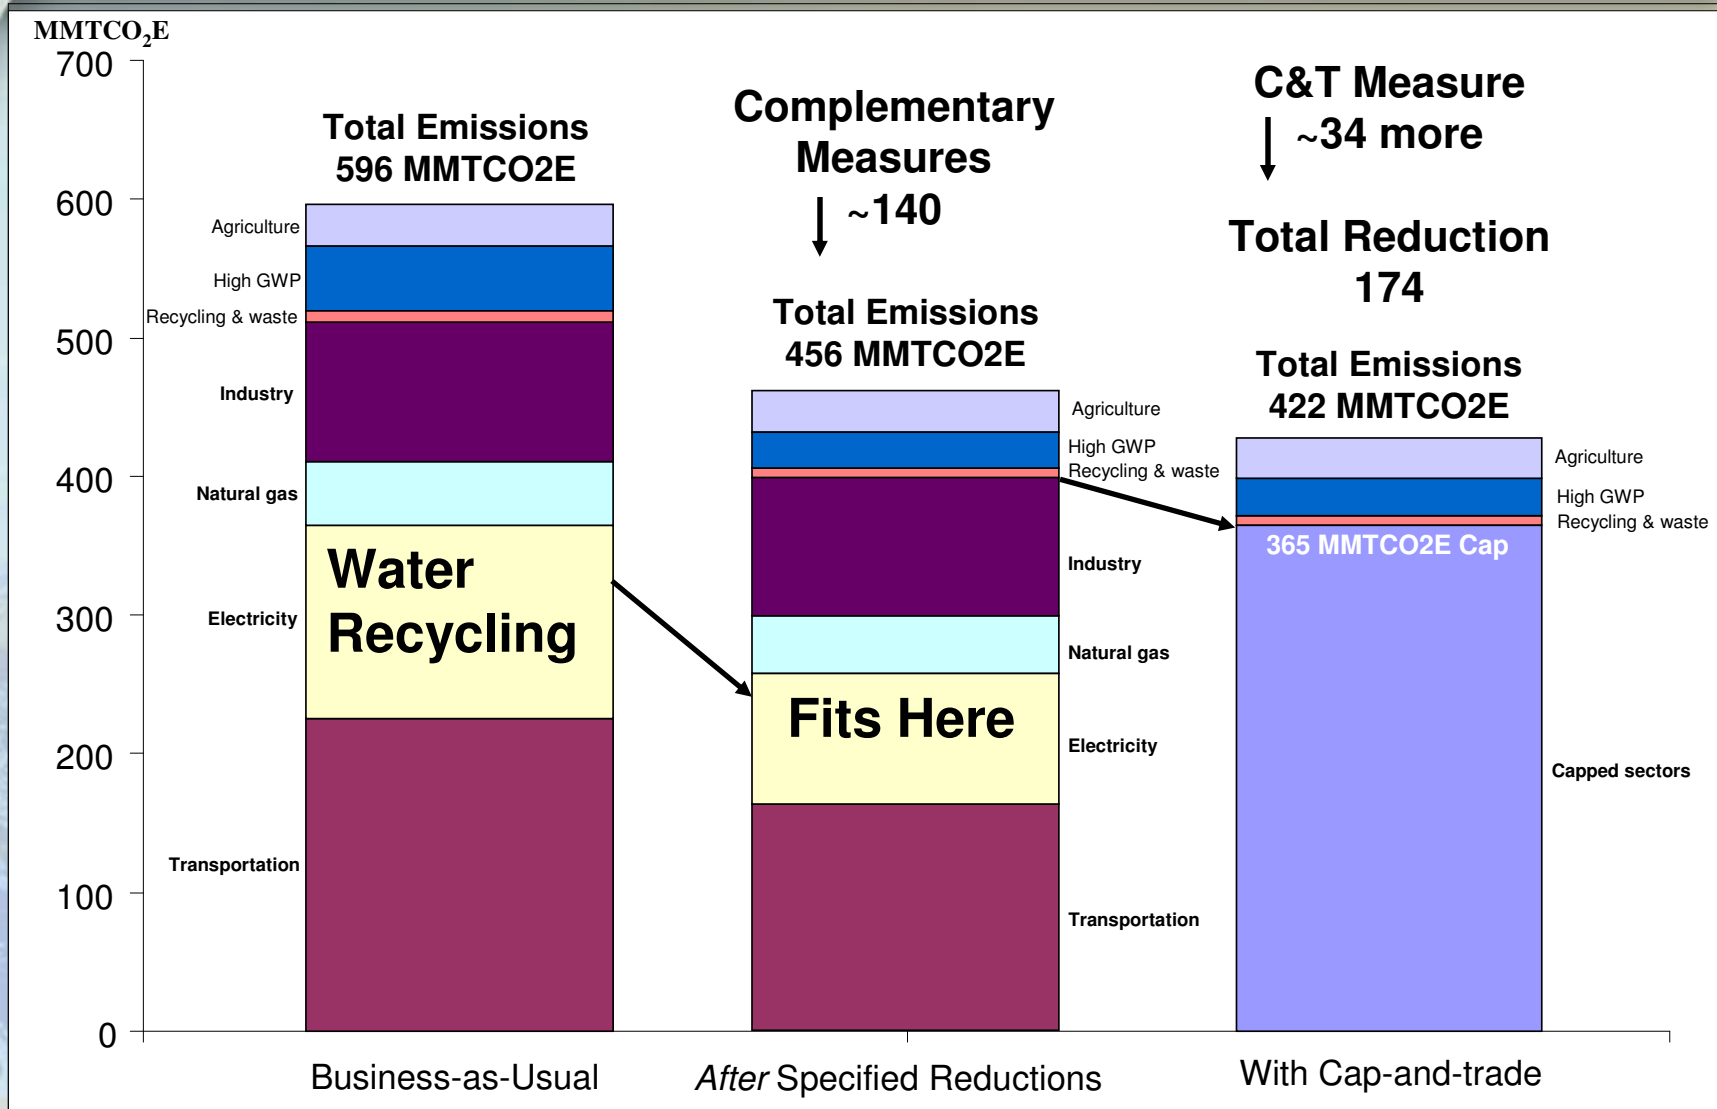

- Requires ARB adopt a Scoping Plan by 2009 to achieve “maximum feasible and cost effective reductions”
 - Recommends over 20 specific measures to reduce GHG emissions, including a Cap-and-Trade Program that starts January 1, 2012

AB 32 and the Scoping Plan

AB 32:

- Shows leadership and provides a template for other states, and nations
- Provides for integration with larger regional efforts such as the Western Climate Initiative and the coming federal program
- Promotes green technology and green jobs
- Helps Californian's use energy more efficiently and ultimately save money

California 2020 GHG Emissions and Recommended Reduction Measures
